Taiz Governorate

A. Summary

In Taiz Governorate, there are 80 communities with a total population of 46,808 impacted by landmine contamination. No fewer than 48 of those are located in Shar'ab Al-Rawna district. A total of 115 mined areas with a reported surface of 2.9 million square meters have been identified. Of this, 2.5 million square meters is reported to be hillside, ridge, or gully overgrown, at least in part, with short and tall grass, bushes, or trees. The survey also recorded five recent¹ and 485 less-recent² mine victims in the affected communities.

B. Location

Taiz Governorate is located in the far southwestern part of the country bordering the Red Sea in the west, with an area of 10,037 square kilometers and a population of approximately 1,870,000³.

C. Scope and history of the landmine contamination

Of the 18 districts in Taiz, six are contaminated by landmines/UXO. Levels of contamination vary from district to district. The landmine-affected districts include Al-Makha, Al-Waze'yah, Maqbanah, Mawiah, Shar'ab Al-Rawna and Shar'ab Al-Salam. No landmine/UXO contamination has been reported from the remaining 12 districts

Of the 616 communities in the six affected districts, 80 reported mine/UXO impacts. In these 80 communities, 115 mined areas are reportedly blocking access to an estimated 2.9 million square meters of land. The landmine problem in Taiz is primarily concentrated in Shar'ab Al-Rawna district, affecting 48 communities. The survey information concurs that the landmines/UXO in Taiz were originated during the 1969–1985 conflict.

D. Impact upon communities

Landmine/UXO contamination affects 80 communities with a total population 46,808. The communities affected consist of 57 dispersed and 23 compact villages. As per the survey's scoring mechanism, four communities suffer a medium level of impact, and 76 a low level.

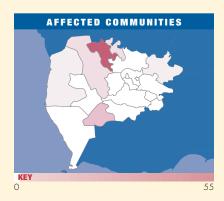

In the majority of affected communities, landmine/UXO contamination is blocking access to pasture and firewood sources. As many as 77 communities reported blocked access to some pastureland, while 10 do not have access to

some of their firewood sources. Among other types of blockages, nine communities reported farmland, six housing, and one water.

The survey found that 490 people in Taiz were injured or killed by mines: five in the past two years, and 485 previously. Of the five recent mine victims, two had come to harm in Shar'ab Al-Rawna, two in Shar'ab Al-Salam, and one in Maqbanah. Two of the recent victims were farming, while the other was herding at the time of accident.

E. Implications for mine action

Landmines in Taiz were laid primarily around points of strategic importance and former military positions during the 1979–1985 conflict. An estimated total surface of 2.9 million square meters is contaminated by mines or UXO. Of this, 2.5 million square meters is hillside, ridge, or gully overgrown, at least in part, with short and tall grass, bushes, and/or trees.

Anti-personnel mines	111	2,827,860
UXO	1	1250
Total	115	2,904,110

Of the 115 contaminated areas, 111 areas are reported to contain anti-personnel mines; three areas a combination of AP, AT, and/or UXO; and one only UXO.

Among the communities surveyed, none of them are reported to have received any mine awareness training during the past two years. In addition, no victim assistance or mine survey/clearance program was evident during the same period. However, local people in eight communities of four districts reported to have attempted some mine/UXO clearance during

the past two years. This includes eight communities in Al-Waz'yah, one in Al-Makha, one in Shar'ab Al-Rawna and one in Shar'ab Al-Salam.
